</div>

<div class="wrapper">

<div class="rightContainer">

<h1 class="para">

It is expected that sales of reconditioned used automobiles would rise in light of the current challenging economic climate. Leasing cars rather than owning them entirely is a prevalent practise in the majority of the world's nations. A lease is a legally binding agreement between a buyer and a seller wherein the buyer is required to pay the seller or financier in set payments over a certain period of time, usually months or years. After the lease term is up, the buyer will have the option of purchasing the vehicle for its residual value, or anticipated resale value. Therefore, the ability for sellers and financiers to accurately anticipate the residual value of automobiles is of economic significance.
